FEBRUARY 13, 2019

With 11 reporting, EAOC members had 7,344,000 in total sales in 2018.

Clifford Phipps, DDS gave the Classification presentation this week. He told us about the advancements in dentistry. When a tooth was missing, depending on the strength of the surrounding teeth a fixed bridge was usually the treatment. Now a cylinder of titanium is implanted into the jaw bone. The success of the implant is based on being kind to the bone. The bone needs to grow around and through to make a direct connection with the cylinder. 95% are successful. The new crowns are made of zirconia, a new ceramic-like material that combines the strength of metal with the natural look of porcelain for esthetics. Dr. Phipps also showed us an example of a hybrid denture supported by implants.

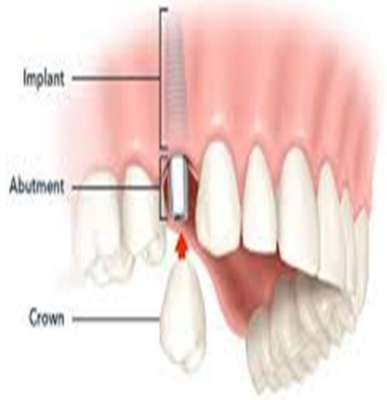

TO SUCCEED IN
BUSINESS IT'S NOT
WHAT
YOU KNOW BUT
WHO
YOU KNOW THAT
COUNTS MOST!

SCHEDULE

February 20th
No Meeting
February 27th

Thought for the Week

"Do not wait; the time will never be 'just right'. Start where you stand, and work with whatever tools you may have at your command, and better tools will be found as you go along."

George Herbert
